

FRANK REGINALD COLACO

Senior Software Engineer | Technical Lead | Java | Spring Boot | Distributed Systems | Event-Driven Architecture

Mumbai, Maharashtra, India | frank.frank07@gmail.com | +91 90286 92695 | [LinkedIn](#)

PROFESSIONAL SUMMARY

Senior Software Engineer and Technical Lead with 15 years of experience designing, developing, and operating enterprise applications across travel and banking. Specialised in Java, Spring Boot, microservices, distributed systems, event-driven architecture, Apache Kafka, REST APIs, and third-party integrations. Hands-on across architecture, application development, automated testing, observability, production readiness, and operational support, with experience mentoring engineers and delivering highly available systems in regulated enterprise environments.

TECHNICAL SKILLS

Languages: Java (JDK 8, 11, 21), SQL, PL/SQL

Backend: Spring Boot, Spring Data JPA, Spring Kafka, Java/J2EE, REST APIs, Microservices

Distributed Systems & Messaging: Apache Kafka, Event-Driven Architecture, Asynchronous Processing, TIBCO JMS

Data & Observability: PostgreSQL, Elasticsearch, OpenTelemetry, Grafana, Distributed Logging

Testing / Build / CI/CD: JUnit, Mockito, Maven, GitHub Actions

Architecture & Leadership: High Availability, API Architecture, Enterprise Integration, Solution Design, Code Reviews, Mentoring, Production Support

PROFESSIONAL EXPERIENCE

American Express Services India Pvt. Ltd.

Jun 2023 - Present

Senior Software Engineer

Technical lead and hands-on backend engineer for distributed post-booking services and member communications.

- Architected and built the Post-Booking Communications (PBC) platform from the ground up, establishing an event-driven foundation for post-booking member communications.
- Designed and delivered integrations supporting post-booking policy retrieval and booking cancellations, processing a combined volume of approximately 10,000 production requests per day in the US market.
- Designed and implemented integrations between internal applications and third-party travel platforms, including iSeatz/LXP, Sabre, Expedia, and Switchfly.
- Implemented asynchronous event processing using Spring Kafka, configuring application-level Kafka connectivity and publishing post-booking events for downstream processing; the US flow processes approximately 5,500 offline events per day.
- Designed Elasticsearch audit trails for third-party request/response interactions, enabling transaction traceability and supporting investigation and root-cause analysis of Operational Risk Events (OREs).
- Used OpenTelemetry and application logs for distributed transaction tracing and production troubleshooting; created Grafana dashboards for application health and operational monitoring.
- Used Spring Data JPA with PostgreSQL for event-processing data access and persistence; developed unit tests with JUnit and Mockito.
- Used Maven for builds and maintained application-specific GitHub Actions configurations based on enterprise-standard CI/CD workflows.
- Provided hands-on technical leadership across solution design, implementation, code reviews, troubleshooting, production support, mentoring, and KTLO activities including Java upgrades, security patching, and SSL/TLS certificate renewals.

IBM India Pvt. Ltd.

Apr 2020 - Jun 2023

Senior System Analyst (Technical Lead)

Served as Technical Lead for highly available post-booking services supporting premium card-member travel journeys.

- Designed and built Java and Spring Boot microservices from the ground up for post-booking travel capabilities.
- Designed and implemented iSeatz/LXP API integrations from the ground up for policy retrieval and booking cancellation workflows.
- Developed REST-based integration flows between internal applications and third-party travel platforms, implementing business logic across multiple service boundaries.
- Contributed to architecture and development of high-volume backend services with a focus on reliability, maintainability, and production readiness.
- Led a team of three engineers, providing technical direction, design guidance, implementation support, code reviews, and mentoring.
- Participated in technical design, automated testing with JUnit/Mockito, production troubleshooting, and root-cause analysis for distributed backend applications.

IT Analyst

Backend engineer working on enterprise banking applications and inter-application integration.

- Contributed to migration of inter-application communication from an internally developed proprietary protocol to TIBCO JMS, implementing consumer-side integration for receiving and processing messages.
- Developed TIBCO JMS consumers and implemented real-time request-response processing and complex banking business rules using the Bank Transformation Toolkit (BTT).
- Contributed across technical design, backend development, system integration, testing, troubleshooting, and production delivery in a regulated banking environment.

Intellect Design Arena Pvt. Ltd.**Feb 2015 - Jun 2016****Associate Consultant**

Backend and database developer on Intellect banking products supporting client implementations including Mashreq Bank and National Bank of Abu Dhabi (NBAD).

- Designed and developed PL/SQL stored procedures to automate End-of-Day (EOD) and Beginning-of-Day (BOD) report generation within the banking product.
- Automated previously manual reporting processes, reducing manual reporting effort by approximately 90%.
- Developed database-driven processing to support regulatory and reconciliation reporting requirements for client implementations.

Atos India Pvt. Ltd.**Sep 2011 - Jan 2015****Software Engineer**

Software engineer responsible for development, rollout, and production support of enterprise applications for Siemens.

- Contributed to rollout of the Nexus enterprise application to Austra-Antal Networks (AAN), supporting Siemens operations across Argentina, Colombia, and Peru.
- Developed and maintained application components using Java 6, Oracle, and SQL, working with a proprietary Java-based workflow engine developed by Siemens.
- Maintained and supported workflows for domestic/international travel expenses and employee leave management, including application troubleshooting and production support.

EDUCATION**Bachelor of Engineering (Information Technology) - University of Mumbai**

2008 - 2011

Diploma in Computer Technology - Maharashtra State Board of Technical Education (MSBTE)

2005 - 2008
